

DENİZ ZEYBEK

Senior Full-Stack Engineer (Frontend Focus) | Vue.js · TypeScript · AI-Assisted Development

zeybekdeniz64@gmail.com | github.com/denizzeybek | linkedin.com/in/denizzeybek | Turkey (Open to Remote)

SUMMARY

Senior engineer with **6+ years** of experience shipping production web applications. Frontend-rooted and framework-agnostic — deep expertise in Vue.js (Composition API) and TypeScript, with hands-on React experience — and now delivering features end-to-end across frontend and backend. Specialized in **AI-assisted development** and agentic AI workflows with Claude Code; built a delivery workflow that cut a 6-sprint scope to 2 sprints (**3x faster**) without sacrificing test coverage. Strong advocate of TDD and contract-first testing (Vitest, Playwright).

CORE COMPETENCIES — AI-ASSISTED DEVELOPMENT

- **Agentic development workflows:** Designed Claude Code setups for production codebases — project-level CLAUDE.md conventions, custom skills, hooks, slash commands and rules scoped to specific file types.
- **Parallel AI agents:** Orchestrated multiple AI agents in parallel using git worktrees and agent/team mode; configured permission modes and sandboxing for safe autonomous runs.
- **AI-driven testing:** Built contract-first TDD skills and Playwright E2E infrastructure for AI agents; used AI to generate BrowserStack test suites at scale.
- **3x faster delivery:** Built an agentic development workflow (custom skills, hooks, TDD guardrails) that enabled delivering a 6-sprint scope in 2 sprints with full test coverage.

EXPERIENCE

Senior Frontend Developer | InsiderOne | Apr 2025 – Present

AI-powered customer engagement platform serving 2,000+ enterprise clients incl. Samsung, L'Oréal, Toyota

- Delivering **full-stack features** across a **microfrontend and microservices architecture** — NestJS services to Vue.js data visualization — using AI-assisted development to own work beyond the frontend.
- Architected and built a greenfield rewrite of a core analytics dashboard with full TypeScript, Composition API and a **composable-based architecture**, aligned with the company's agentic development initiative.
- Built and published an **internal npm package** for a shared filter system, developed test-first with TDD.
- Built an LLM-powered **Figma-to-code plugin** that converts designs into design-system components with automated Playwright visual verification and self-healing fixes.
- **Drove AI adoption** within the team — introduced Claude Code workflows, shared reusable skills and conventions, and onboarded teammates to agentic development.
- Configured **Webpack Module Federation** for Vue micro-frontends; GitHub Actions CI/CD; Vitest & Playwright testing.

Frontend Developer | Ruul | Aug 2022 – Apr 2025

- Spearheaded migration from **Vue 2 to Vue 3** Composition API with TypeScript; drove architecture decisions in an Agile team.
- Architected a reusable UI component library with **50+ components** adopted across 3 products.
- Migrated state management from **Vuex to Pinia**, reducing boilerplate code by **~30%**.
- Delivered production applications with **Vue.js and Nuxt.js**; translated Figma designs into responsive UIs using Tailwind CSS and Ant Design Vue.

Software Developer | Eclone | Jun 2020 – Aug 2022

- Built and deployed **full-stack applications** with Vue.js, ASP.NET and C# for enterprise clients.
- Designed and maintained **SQL Server** databases, optimizing query performance for backend APIs.
- Worked directly with clients to gather requirements and translate business needs into technical solutions.

SKILLS

AI & Agentic Dev: Claude Code, LLMs, AI Agents, Agentic Workflows, Prompt Engineering, Skills & Hooks, CLAUDE.md, Git Worktrees, AI-Assisted TDD

Frontend: Vue.js (Composition API), React, React Native, Nuxt.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, SASS, Ant Design Vue, Microfrontends, Component Libraries, Design Systems, Data Visualization

Backend: Node.js, NestJS, Microservices, RESTful APIs, Auth (JWT, httpOnly Cookies), ASP.NET, C#, SQL Server, MongoDB

Testing: Vitest, Playwright, TDD (Test-Driven Development), Contract Testing, E2E (End-to-End) Testing, BrowserStack

DevOps & Tools: GitHub Actions, CI/CD, Webpack, Vite, Module Federation, Git, Pinia, Vuex, Figma

EDUCATION

BSc Computer Engineering | Muğla Sıtkı Koçman University | 2017 – 2022

LANGUAGES

English (Professional Working Proficiency) | Turkish (Native)
